

## Birth horoscope

First of all make sure you have added “persons for horoscope” and that you made a “family for horoscope” as for a complete birth-horoscope the Father and Mother and sometimes the father’s and mother’s mother. Also when the birth-horoscope is for a male person information about a previous brother is required. ( See the help files how to use ).

If you have not selected a person for a birth-horoscope automatically the “select person for birth horoscope” window will open. Once you made a selection this one will be used as default until you select another person.

After clicking Start -> Birth horoscope -> Select person for birth horoscope.

You will see a window like
